

INVIDATA

Invisible Data Security

Problem /Challenge

Security and Data breach threats are increasing despite all currently available security solutions.

Observation

Visible and accessible data is easy to hack.

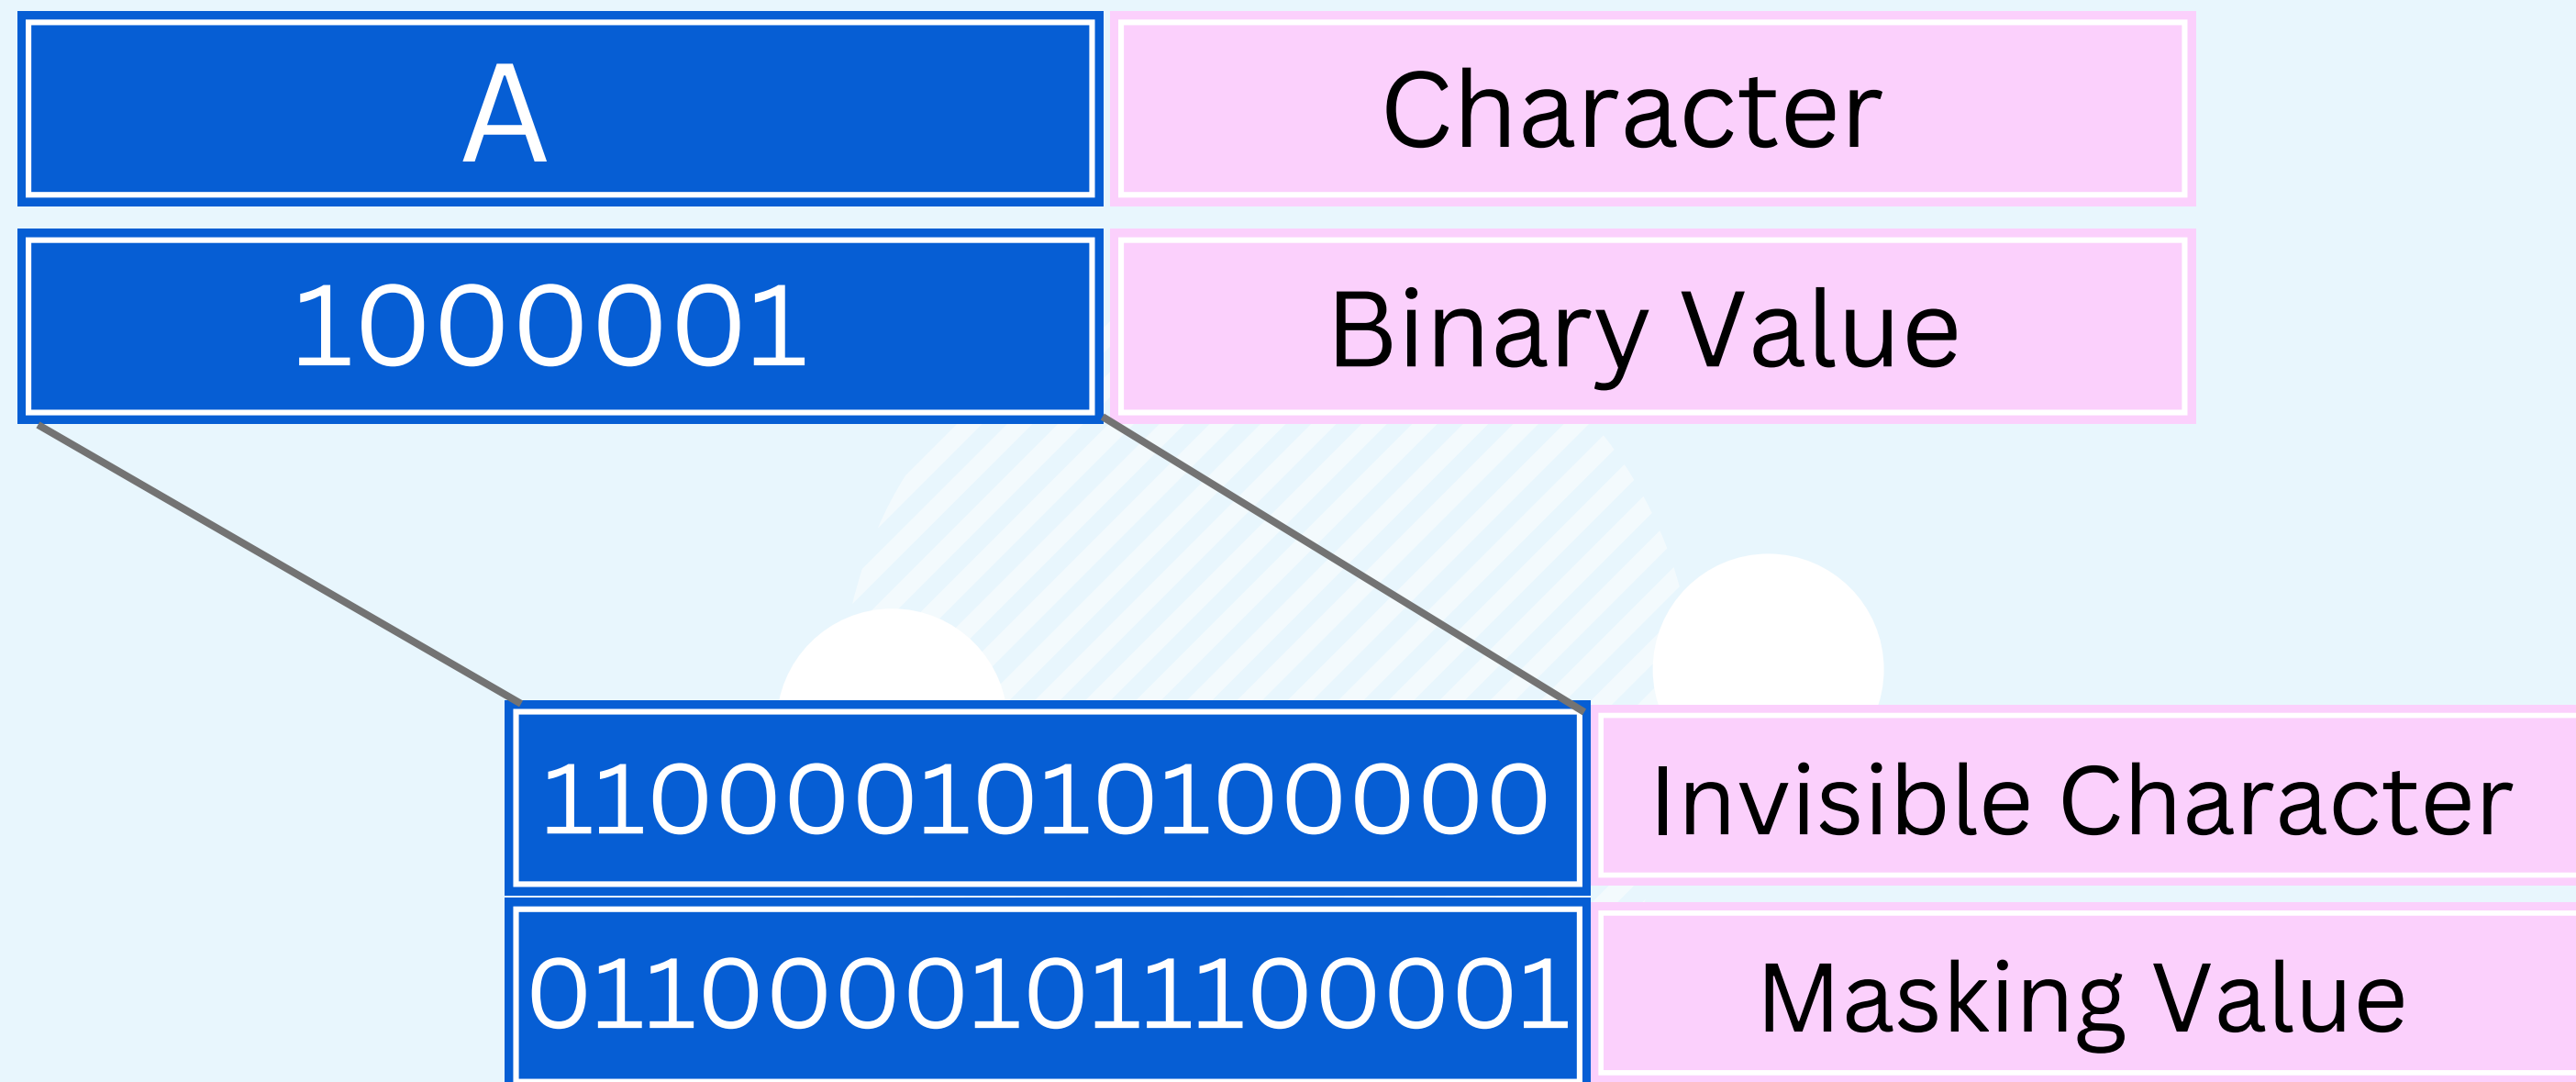

Our Solution

INVIdata is an exceptional data security solution that specializes in preventing data theft. Unlike other solutions that only offer external protection, INVIdata is an internal data security solution that employs advanced data storage systems similar to the human brain to conceal information. Additionally, it utilizes DNA-like recognition systems to verify the authenticity of users.

INVI^{crypt}ion Algorithm

It is brain like data-storing system by blending visible characters with invisible Unicode characters, to make them invisible. This ensure that data remain invisible just like our thoughts in brain, just like thoughts in brain cannot be hacked

INVI^{layer} Algorithm

It is a DNA-like recognition system where user IDs act as unique DNA signatures used for recognizing authorized users.

Non accessible

Non Hackable

Non transferable

Non corruptible

INVI*manager* & INVItally

An offline Secure file access management application

Auto real time INVIencryption and INVId decryption

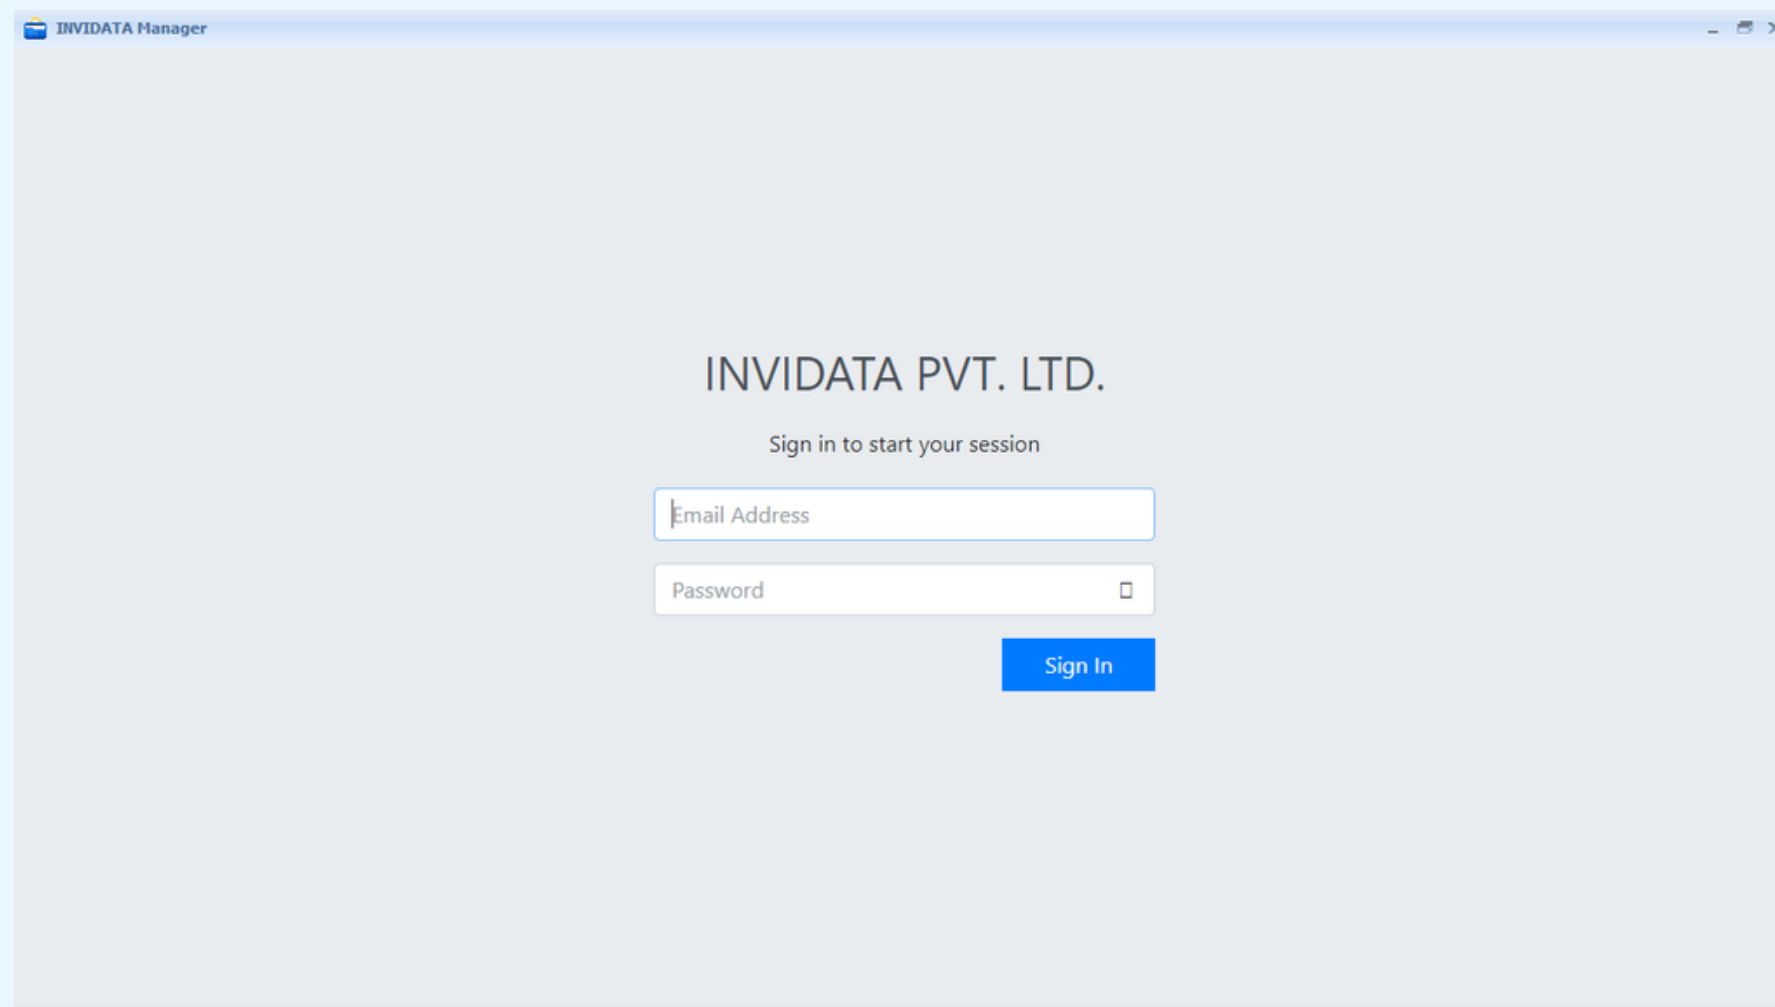

Authorised file access control

INVIlayer file is non transferable/copyable

Works on any file format

99.99% Offline tool (need internet access only for authentication)

Dashboard

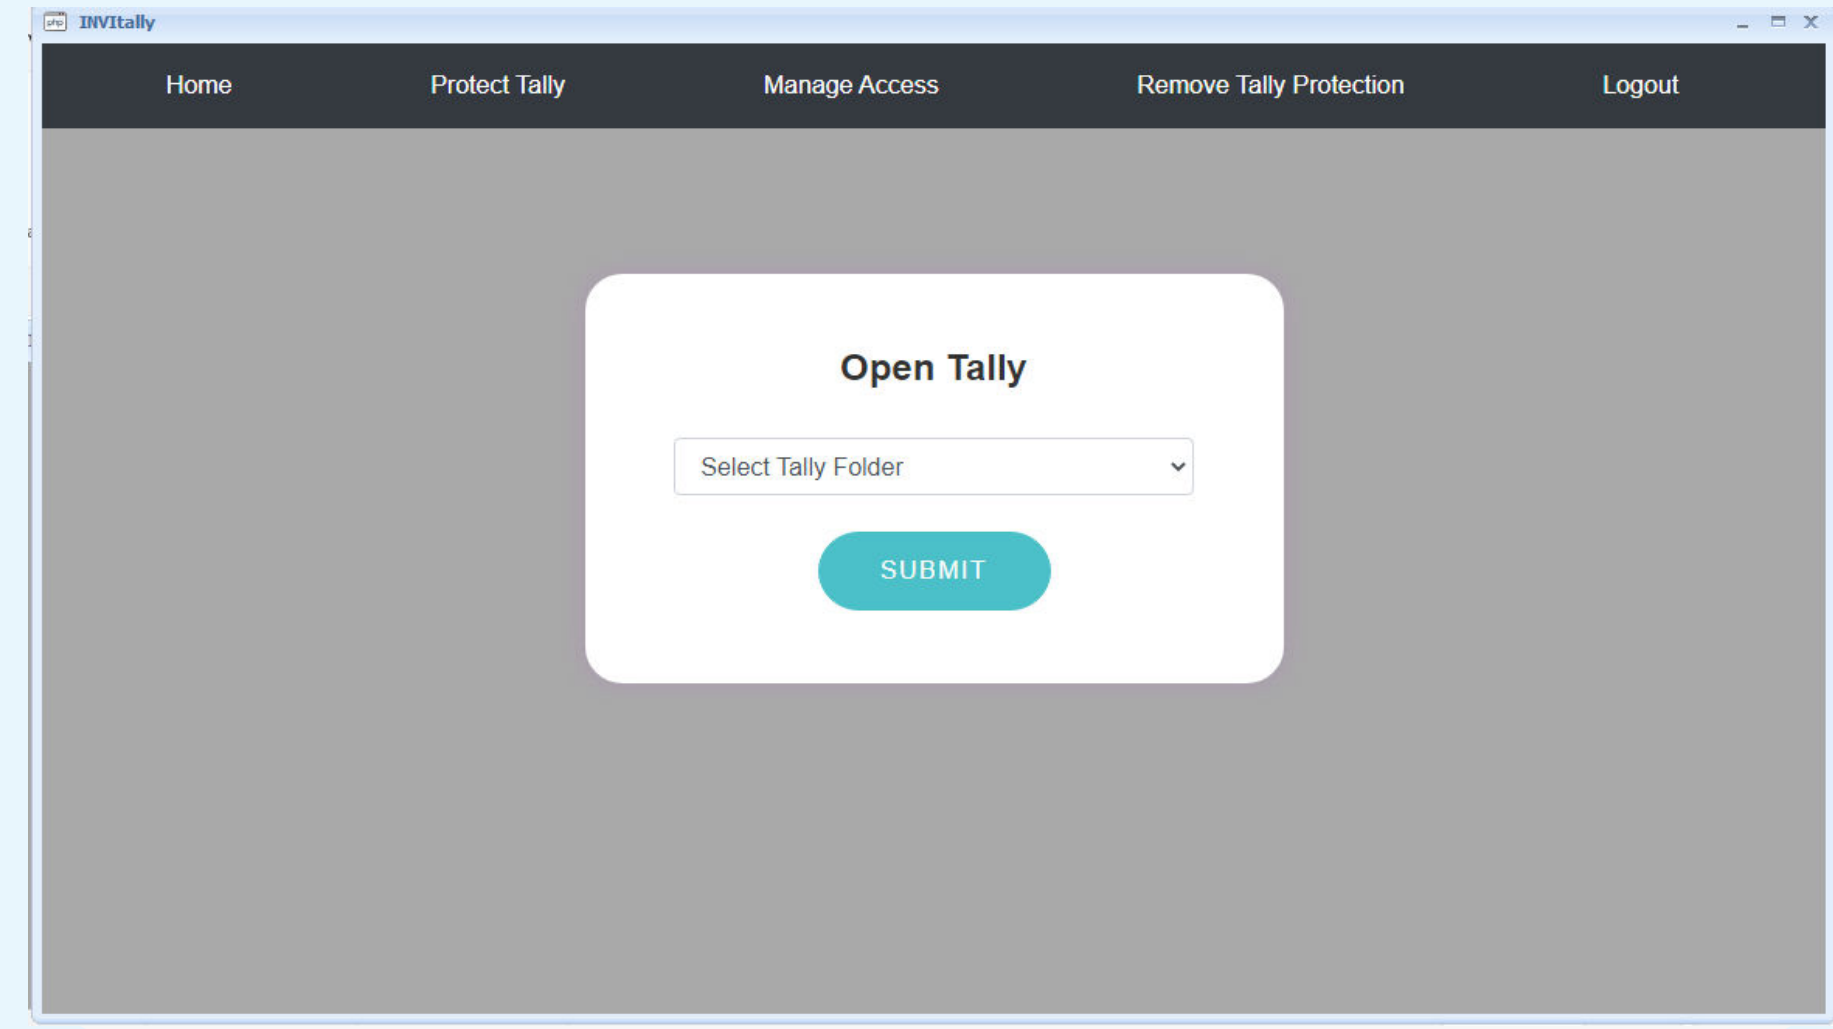

(Internet Connectivity not required)

INVI *tally*

A screenshot of a web browser window titled "INVItally". The main content area has a grey background. In the center, there is a white rounded rectangle containing the text "Login to INVItally". Below this text are two input fields: the first is labeled "User ID(registered email ID)" and the second is labeled "Password". At the bottom of the white rectangle are two teal buttons: "LOGIN" and "EXIT".

Credentials

(Internet Connectivity required)

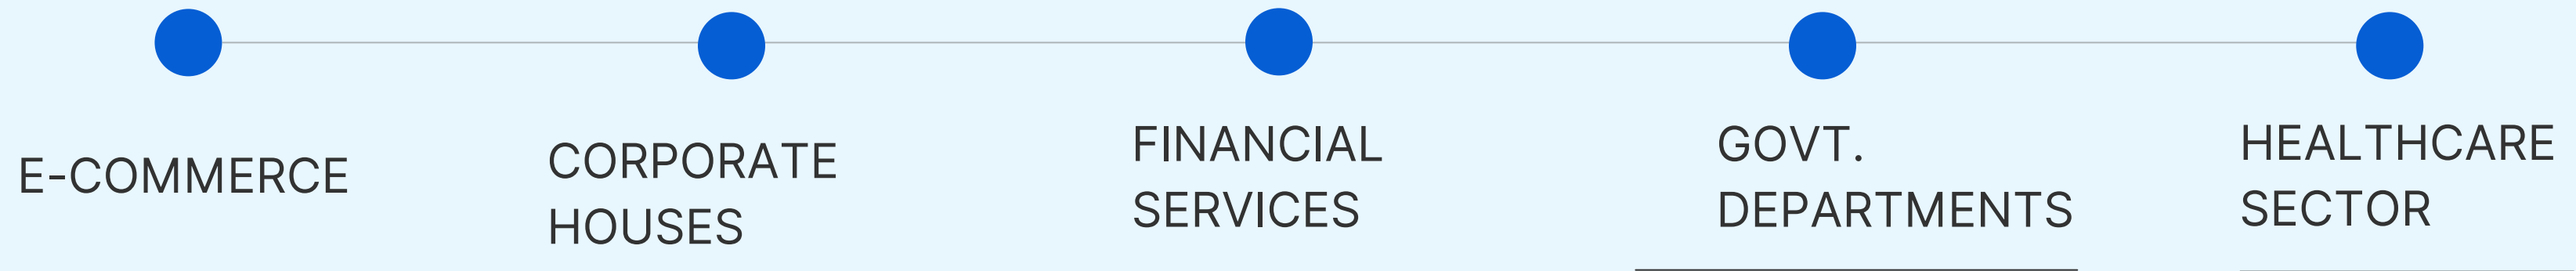

A screenshot of a web browser window titled "INVItally". The top of the window features a dark grey navigation bar with five items: "Home", "Protect Tally", "Manage Access", "Remove Tally Protection", and "Logout". The main content area has a grey background. In the center, there is a white rounded rectangle containing the text "Open Tally". Below this text is a dropdown menu labeled "Select Tally Folder" with a downward arrow. At the bottom of the white rectangle is a teal button labeled "SUBMIT".

Who can Benefit?

Practically all organisations and professionals who want to protect themselves from scammers/hackers by ensuring that data is secured and protected from unauthorised recipients.

Current Status

- **Website** with self service module is ready
- **INVItally** fully functional (first version).
- **INVImanager** fully functional (first version)

Fund Raise Plan

- Amount to be raised: **Rs. \$250k (Rs. 2 Cr)**
- Minimum Ticket Size: **Rs. 5 Lakh**
- Valuation: **\$5 million(Rs. 40Cr)**

Utilisation of Funds

- ✦ 20% - Building iOS solution
- ✦ 40% - Technical Team & Salaries
- ✦ 20% - Business Development
- ✦ 10% - IP
- ✦ 10% - Marketing and Promotion

Monetization Plans

We plan to begin with Freemium model for initial couple of months and then start monetizing by appropriate subscriptions

Primary Sales Unit: Price Per User Per Month

MRP (per month)

(to be paid for 3 months)

INVImanager

Rs. 699

INVItally

Rs. 799

Annual Plan

Current Discounted Prices

Rs. 6990

Rs. 7990

MRP (per month)

(to be paid for 3 months)

Rs.399

Rs.499

Annual Plan

Rs.3990

Rs.4990

Additional discount of 10% for someone who is subscribing for 10 users or more.

Sales Partners:

Basic and Master

Basic Sales Partner :	Commission between 20 to 30% of Sales For first 10 clients: 20% 11 to 50 clients: 25% 51 and above: 30%
