April, rest in next quarter.**

Key Differentiators

Supports and complements existing Allopathy-based diagnostic process

Inner Health:

Measures your inner health unlike wearables in the market

Root-cause based:

Focuses on the initial stage of disease formation, and not on symptoms

Know yourself:

Makes you understand your mind and body better

Predict:

Get to know the onset of health conditions well in advance

Holistic:

Work on both your body and you mind – things are more interconnected than they seem

You are unique:

Based on the principle that each of us different, what works for you may not work for someone else

Investment Required: 5Cr

Scale-up

There are 7+ lac Ayurveda centers in India. Establish 2500 centers in 2 years.

Yoga, Spa, Gyms

Extend the data and holistic reports to the connected eco-systems for lifestyle suggestions

Overseas

With GDPR and granted patent, reach out to 500 Ayurveda centers in Europe, South America and Gulf in 2 years.

- **Mass manufacturing:** The device cost goes down by 50% if the quantity is 1000+.
- **Increase Sales & Marketing team:** For both Indian and overseas markets.
- **Self-administrable revised Hardware:** At places where Ayurvedic doctor is not available.
- **GDPR, certifications and backend:** Create one backend platform which caters all APIs.
- **Chief Growth Officer:** Strategy and Operations.

Experts Speak

Nadi Tarangini can be a great 'Make in India' product. For the first time, the subjective knowledge of Nadi Pariksha has been converted into objective, quantitative and measurable data. This instrument with standardized data can be a revolution in Ayurveda diagnosis. I congratulate Dr. Aniruddha for this wonderful work which is the need of the hour.

Padmashree Dr. H. R. Nagendra
President VYASA, Chancellor S-VYASA
University

I came to know recently that there is finally a device based on the Indian science of Ayurveda made by an Indian scientist – Dr. Aniruddha Joshi. His efforts over the past several years have culminated in Nadi Tarangini – a scientific Nadi Pariksha system (hardware + software) based on thorough validation process of computer science. It sounds like it is not only a powerful diagnostic support for Vaidyas but it can also help enhance patient satisfaction and belief in Ayurveda.

Padmashri Vaidya Rajesh Kothecha
Secretary of the Ministry of AYUSH

Nadi Pariksha is a medieval practice in Ayurveda which is being practiced only by select experienced physicians. If this highly subjective diagnostic tool can be translated into a technological format, it will be a very useful, adaptable and objective diagnostic support for practicing physicians. Nadi Tarangini is a right step in this direction.

Prof. Vaidya G. G. Gangadharan
Director, Ramaiah Indic Specialty
Ayurveda
