

Building an intelligent driver safety system

With an support ecosystem around it

Drivers esp. of commercial vehicles are a **completely ignored lot**

Shockingly there life expectancy could be lower by as much as **15 yrs.** vs. the general population.

Road accidents are one of the top 3 major concerns for drivers as well.*

- Existing solutions **do not cater to truck drivers**, hence **poor** adoption (Real-time alerts are not real)
- **80%** of accidents are due to Human error*
- Most drivers are **untrained** and lack the necessary skills to operate a truck safely.
- **Lack of data** of HCV drivers in logistics, finance and insurance space makes it difficult to track performance.
- No **standard scoring** (Drivers are not judged on the same parameters)

4.1 L

People are injured/disabled every year in India

3% of GDP

Road accidents cost our country up to 3% of our GDP

1.70 L

People die in road accidents every year, the highest in the world

50% deaths are under the age of 35

65% of these deaths are on National highways*

How have we cracked driver adoption?

Our app **हम safer** focuses on driver centric programs, **things that they and their families need** and is built for making the drivers life safer and easier.

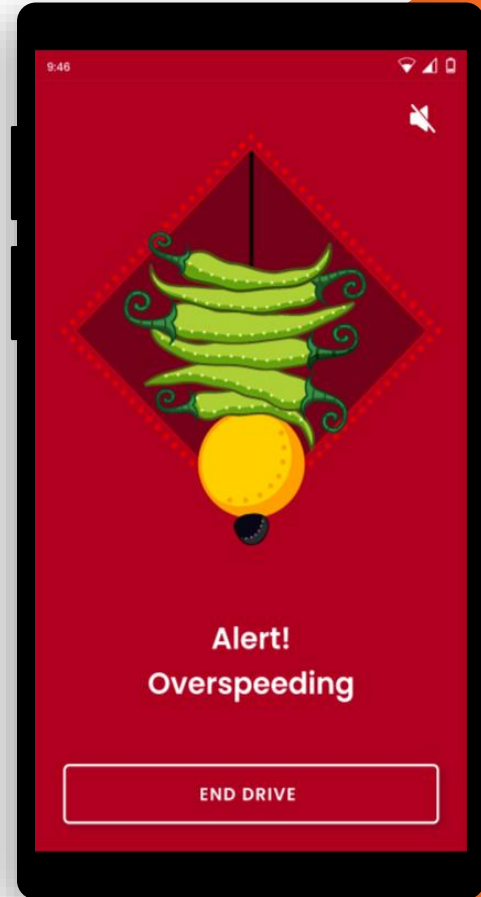

We will **dominate** the HCV driver and logistics risk reduction space.

Our proposal is under consideration in MORTH. Hence, scoring system will be used across the country to score drivers. This will reduce risk by over **40%**.

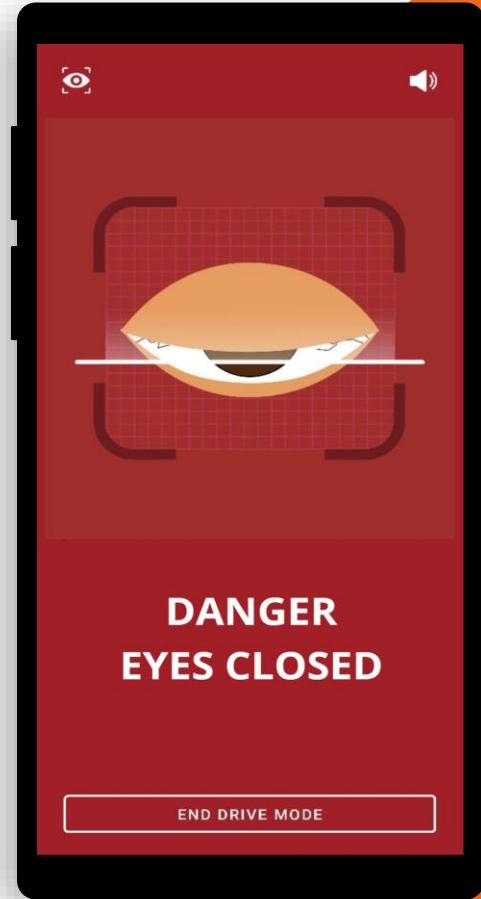

Image used for illustrative purposes

- The HumSafer app, designed to monitor and enhance driver behavior, incorporates features such as **drowsiness alerts**, **over-speeding alerts**, **adherence counts** and **driving compliments**, and **prompts for regular breaks** to combat fatigue.
- The Safe Driving Score (**SDS**) is a metric assigned to drivers based on their driving behavior, with **3X** improvement in adherence to speeding in 3 months.

- The selfie camera detects sleep and sends **audio-enabled notifications** and displays a red screen when a driver's eyes are shut for more than 3 seconds.
- Results from the latest version showed that the app prevented accidents and saved **1336** lives. The analysis of data indicated that the average number of drowsiness alerts sent to drivers improved from **80** to **35** over the period.

How do we add **value** to drivers?

We now have information on the quality and quantity of driving. That's why we have partnered with companies that provide loans and insurance to drivers without the need for collateral or a lot of paperwork.

So now, it's easier for them to get help if needed.

How do we add value to Enterprises and Fleet owners?

Enterprise and fleet owners have the advantage of a fully **customizable** dashboard, allowing them to select most relevant data points for their operations.

Additionally, they have the option to share **selected driver data** with their clients to provide transparency and reassurance during the transportation of their cargo.

Based on our learnings from our inhouse insurance experts.

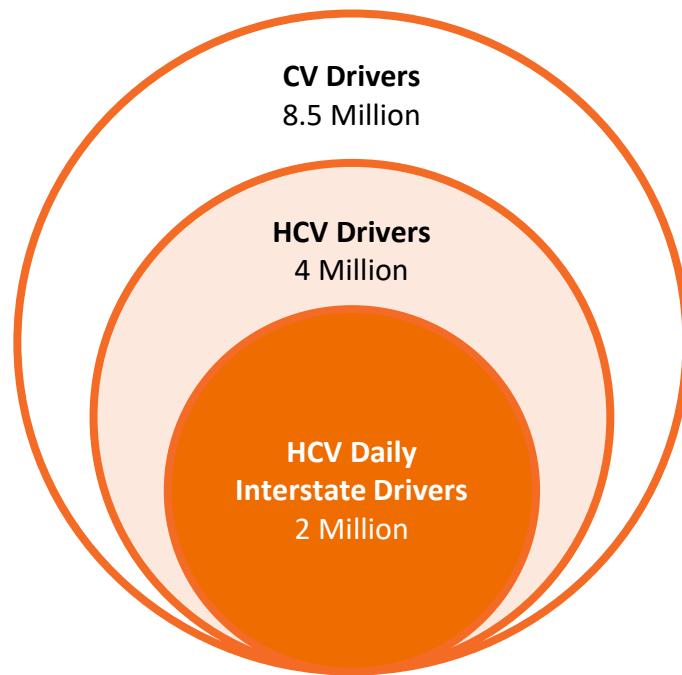

“Motor insurance accounted for **34.1%** of the non-life insurance premiums earned, followed by health insurance at **29.5%**”*

Focus first on the 4 mil odd HCV drivers

This presents both a significant commercial and an impact opportunity.

Accident claim ratio is as high as **4%** for insurance companies*

According to recent reports, the industry was valued at approximately INR 60,000 crore (approximately **\$8 billion**) in 2021 and is expected to grow at a compound annual growth rate of around 20% in the coming years.

Fund Raise and Usage

We are looking to raise in a seed round

We had raised a pre-seed round of 1.9Cr to build an MVP and now we are in an early growth stage. Our product has grown organically.

**3-4 Cr.
USD 500K**

Utilization of Funds for Accelerated Growth

Our first goal is to get to 100K+ drivers

Achieve an MRR of 100-150K

Launch various aspects of the support ecosystems such as insurance, product partnerships, loans

Drive partnerships with large fleet owners and Govt STs.

Extended team and mentors

He is Chairman, Ananta Aspen Centre and was President of CII for 2016 – 17. He is the Chairman of Centre for Technology, Innovation and Economic Research (CTIER) in Pune.

Now an app to nudge truck drivers to drive well. It's the only smart app dedicated to the safety of commercial drivers in India, the team claims.

"A free AI-based road safety solution, is on a mission to make life safer and better for India's 8 million truck drivers"

Business Standard

"Adoption of AI and predictive analytics to make India's roads safer. An artificial intelligence-based driver safety app could go a long way in fixing the problem"

"How HumSafer Driver Safety App Has Taken Road Safety A Notch Above"

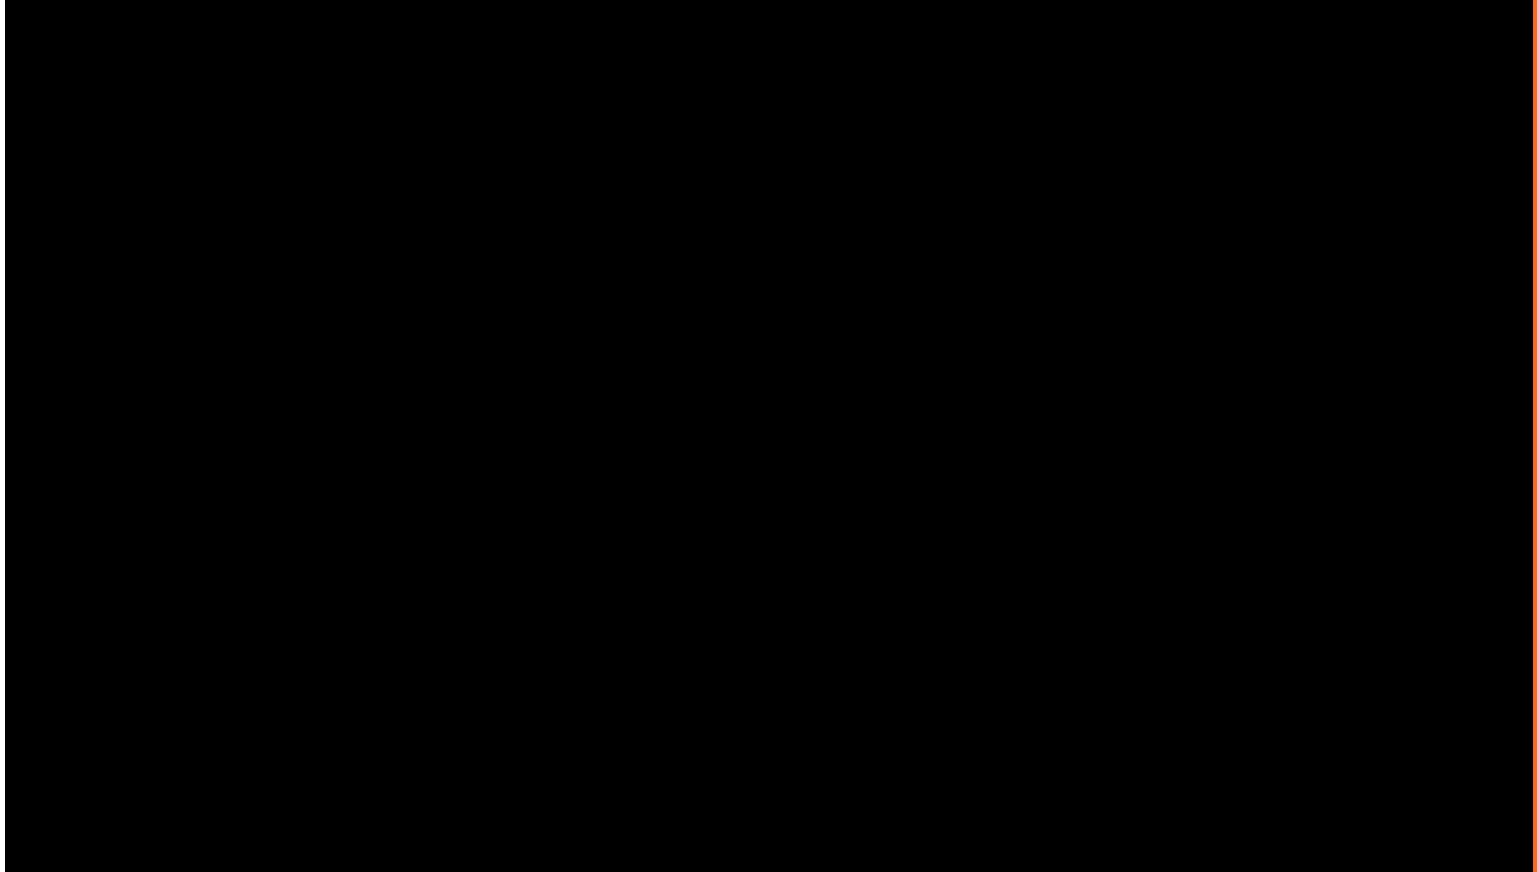

"The startup has built a mobile application which alarms drivers in case of they sleep, thereby preventing road accidents."

"HumSafer App incentivizes truckers to drive safely"
