Minimum Ticket Size: **Rs. 20,000**

(Some portion will be reserved for small ticket size investors, investing Rs. 5,000 each)

Regd. Office : Vadodara, Gujarat

Industry and Opportunity

Previously, all players were chosen based on their abilities and how the coach envisioned the player fitting into the squad. The cameras were just utilised to cover the match, and there were no thorough statistics. A person used to sit and assist in documenting the scoring, assists, blocks, saves, and so on, but times have changed. With the advancement of technology and the engagement of fans, club owners, players, and others, the game has advanced to the next level. Cameras may offer clearer images/videos from different angles and are utilised to determine regulations such as offside, handballs, and so on.

Technology is used by players, coaches, and scouts to work during training and to enhance the player's performance on the field. Furthermore, data is utilised by coaches and scouts to pick the athlete they wish to sign based on club needs and dynamics. It can also be used for increasing the engagement of fans. Loads more data points will be accessible to play in the future as technology advances, which will benefit players, coaches, scouts, teams, fans, sponsors, broadcasters, and everyone else involved in sports.

Services Offerings

Footrax offers data analytics of sports data through wearable tracking solutions for the masses, students in schools and academies, and amateurs playing for enjoyment and fitness, all with self-paced learning modules at fingertips.

Footrax waistband, which is first introduced for Football, has features including Heat Map, Top Speed, Work rate, Acceleration, Playing Time, Sprint Distance, Calories Invested, Number of sprints, Distance covered and Average speed.

Footrax's wearable tracking solution helps in:

- ♦ **Quantitative Data Driven insights**
- ♦ **Digital Personalised Coach**
- ♦ **Monitoring metrics for parents, coaches & amateurs**
- ♦ **Data for scouting support**

Positive Indicators

- ♦ Footrax is targeting the untapped market of amateurs and grassroots players, as of now this technology is only available to the elite level players and top athletes playing either for the super clubs or for their national teams.
- ♦ Footrax is making it available to the masses, to the kids of schools and academies, and for amateurs, playing for leisure fun or fitness.
- ♦ Footrax excel in cost of the product, the price structure provided to the end users, and the understanding of the distribution model and demographics of the country.
- ♦ The human resource capital involved in the product development with experience of the grassroots as well as amateur sports will also help Footrax in establishing itself.
- ♦ The total market size of the industry is of \$30 Billion with a CAGR of 18% and addressable market size is of \$280 Million, which provides great opportunity to scale up.

Competition

Some of the direct competitors are;

- ♦ Global – Sport Performance Tracking, Catapult-Playertek, Tracktics, StatSports and Stats Perform

There is no local direct competition of Footrax. However, some of the indirect competitors are Whoop Bands and other smartwatch and fitness tracker companies but they operate in different market segment.

Footrax sets itself apart by offering its product to the top end, the masses, and the students in school unlike its competitor, they operate in professional market and their target audience is lower end of the funnel. Footrax offers attractive pricing and pay per play subscription model to turf, school and academies.

Risk

- ♦ Any unforeseen circumstances like COVID or war can hamper the global supply chain, which as a result would affect Footrax.
- ♦ Currently, Footrax is sourcing sensors and electronic components from East Asian countries which can hamper the supply chain if any unforeseen circumstances arise.

Founders and Core Team

Kushal Pratap Singh Rathore
Founder and CEO

Kushal is in charge of overseeing Footrax's business. He is an ex-national Footballer, a civil engineer and an entrepreneur. He is also working towards developing grassroots football in India.

Chintan Lodha
Co-Founder and COO

Chintan is in charge of development of Footrax. He is a mechanical engineer and also part of the core team for the development of "centre of excellence" for football players across the globe. He also looks after digital marketing at Footrax.

Fund Raise and Valuation

Proposed fund raise is Rs. 1 Cr. at pre-money valuation between Rs. 7 to 10 Cr.

Floor Price: Rs. 7 Cr, and Cap Price: Rs. 10 Cr

Conversion Condition: 20% discount to next round valuation, if next fundraise happens in 12 months
25% discount to next round valuation, if next fundraise happens in 36 months

Majority of the fund shall be used for Product Development, Marketing and Salaries.

Revenue Model

Footrax currently has three revenue sources.

- ♦ **Turf and Tournaments:** Pay per Play Model, Rs. 50 per hour.
- ♦ **School and Academies:** Subscription Model, Rs. 25,000 per box/month (20 wearables in a box)
- ♦ **Professional Teams, Associations and National Tournaments:** Subscription Model, Rs. 25,000 per box/month (20 wearables in a box)

With the average use of 2 hours per day Footrax is able to recover production cost in 90 days. Present production cost of wearables is Rs. 4,800 but it can be reduced to Rs. 1,500 in future as numbers increase.

Traction/Business till date

- ♦ Currently Footrax has 100 devices available and have already conducted trial on 1,000 unique people.
- ♦ Footrax has already collected data of worth 7,000 game hours and provided insights to its consumers.
- ♦ Footrax has received soft order from 18 facilities and have done 32 iterations of the product till now.

Future Projections

With current fund raise; in next 12 to 16 months, Footrax plan to achieve:

- ♦ CAPEX of Rs. 60 lakhs immediately after the current round and plans to increase to Rs. 2 crores in future.
- ♦ Plans to expand vertically as well as horizontally in the same sport as well as different sports and offer solutions in India and MENA region.

Conclusion

According to prominent market research reports from Statista, KPMG, EY, and others, the entire addressable market was \$118 billion, but when overlapping is taken into account, the total addressable market is \$30 billion, with a CAGR of at least 18 percent. Footrax Pay per Play Model and Subscription Model with unique characteristics of delivering detailed reports on athlete performance would attract a large number of individuals, coaches, academies, and schools in India and abroad, which was previously a device for elite level players. Footrax is bringing to the masses which is largely an untapped market in this segment. Footrax also intends to launch a B2B2C distribution strategy in the future with business units such as schools, academies, turfs, and recreation centres. Footrax offers a strong solution to the masses, backed by technology that has previously been tested on 1,000 people, with 32 iterations of the product suggesting a lot of potential for growth and scaling up in the coming years.
