

Helping cancer patients access
the **right care** at the **best price.**

Problems of a Cancer Patient at Diagnosis

Cancer is complex and expensive

1. Low doctor to patient ratio; 2500 oncologists in India
2. Cancer care in metros / T1 cities, 65% of India lives in T2 and beyond
3. Majority (70%) served by **private** hospitals ; 65% pay out of pocket

Discovery

Discovery Challenges

Choosing right doctor & hospital is confusing
Conflicting clinical opinions

Treatment

Treatment Challenges

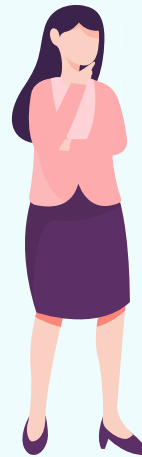

Difficult to compare costs - no fixed-prices
Insurance exclusions unknown
No medical financing options

Recovery

Recovery Challenges

Zero support from hospital on side-effect mgmt., nutrition, mental health

We bridge the **Gaps**

Knowledge Gap

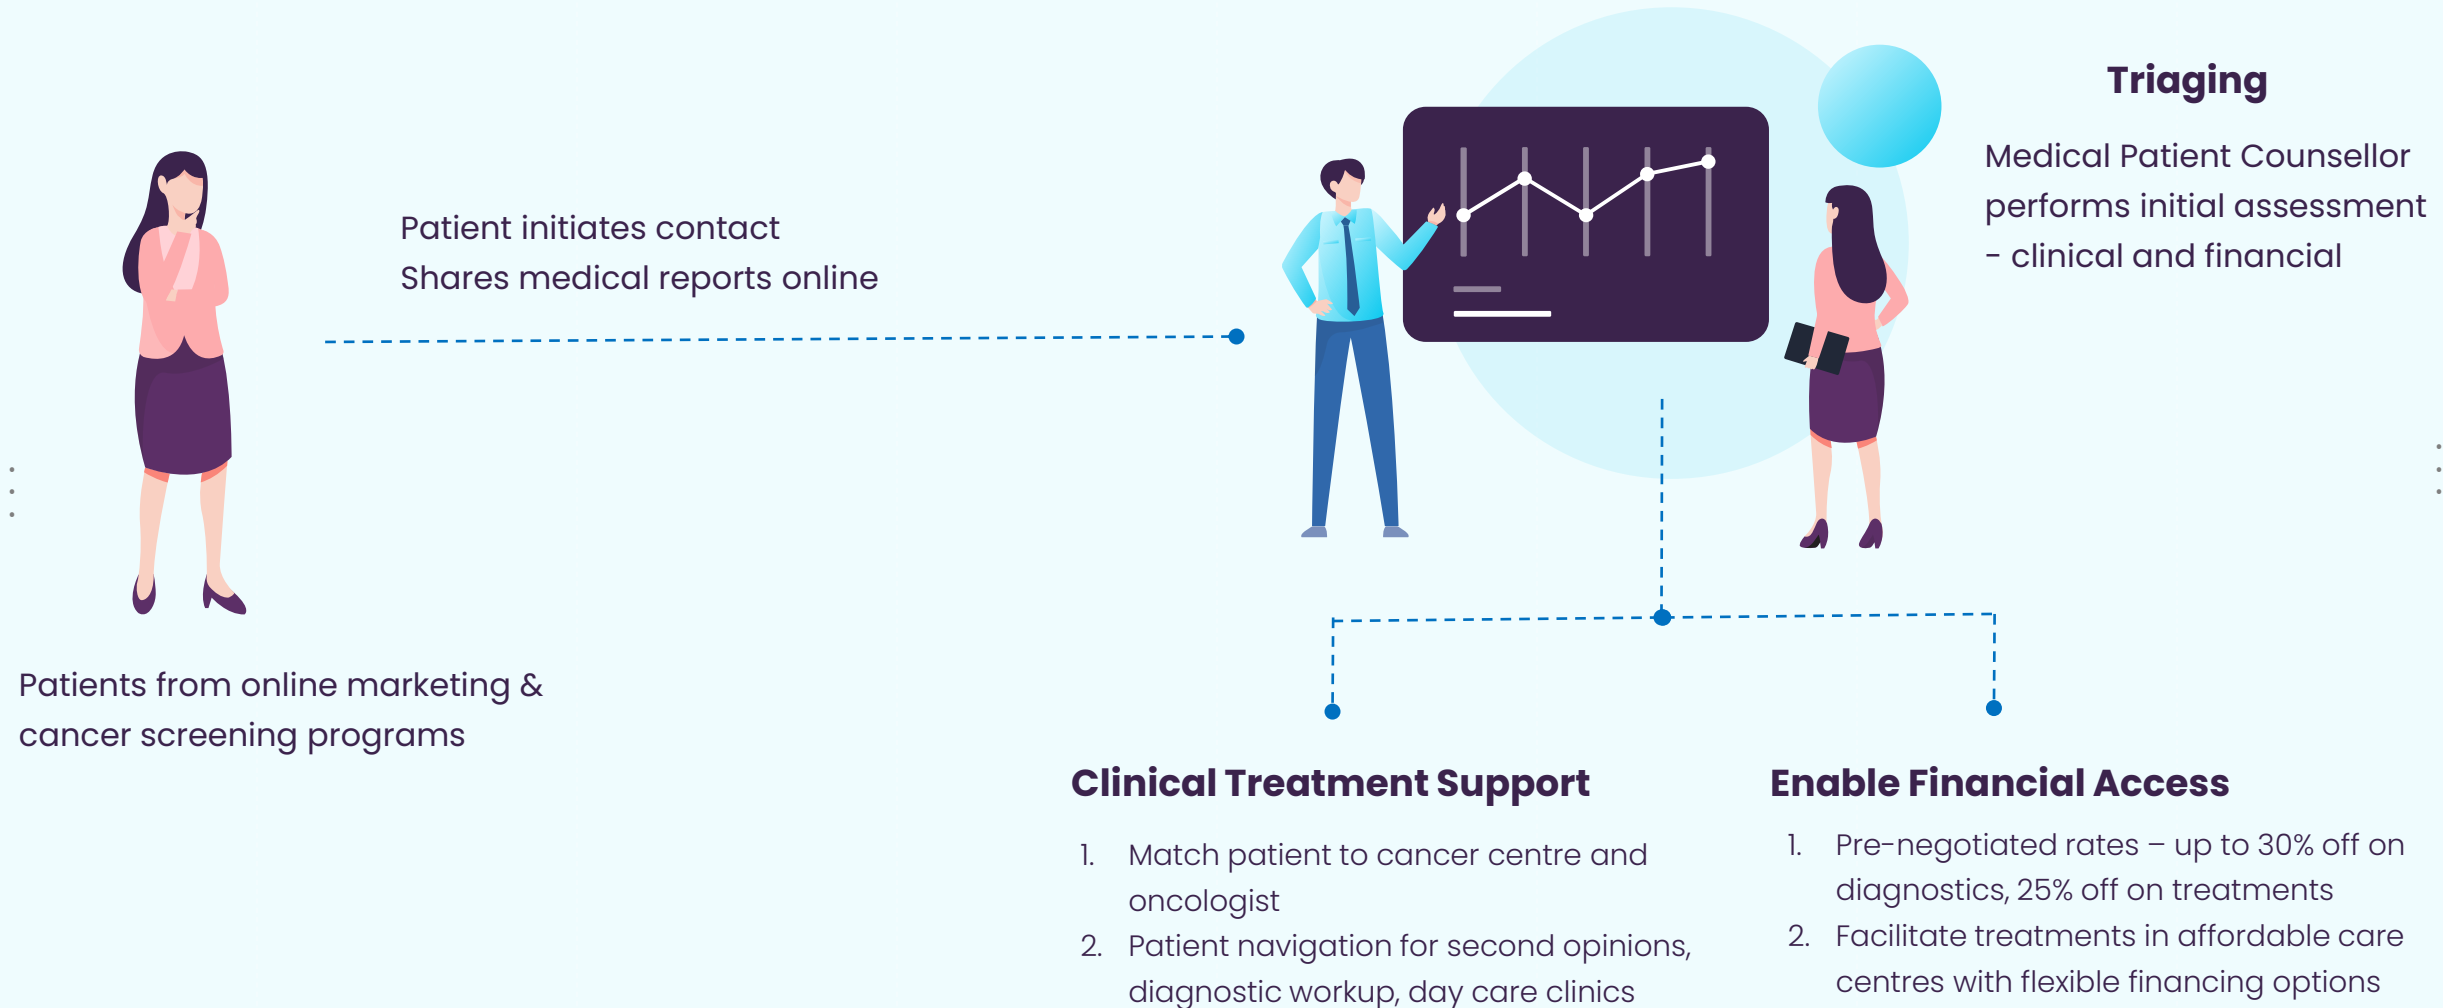

Use Technology

Access Gap

Use Partnerships
